Projects

Inventory Management System

Loyalist College, Toronto, ON

Jun/2024

Summary: Developed a Java-based Inventory Management System to manage products, track sales, and maintain sales history. The system supports adding new products, updating existing product quantities, processing sales transactions, and displaying detailed inventory and sales records.

Technical Skills Used: Java, Exception Handling, Collections Framework Concepts

Airline Reservation System

Hyderabad, Telangana, India

Siddhartha Womens Degree College, Telangana, India

Aug/2022

Summary: Created a Java-based Airline Reservation System to handle flight bookings, cancellations, and passenger management. The system offers functionalities for adding new flights, booking and canceling reservations, and displaying passenger details, all with a user-friendly web interface using HTML.

Technical Skills Used: Java, Exception Handling, Collections Framework Concepts.
